Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The closest prior arts is Nordskog (US 4,867,993) in view of JP-5-40843 (Y2). The Nordskog references teaches coffee filters having an open frame slidably connected to a closed frame, with the open frame smaller than the closed frame, and does not teach a body part connecting the closed frame with the open frame. JP teaches open frame foldably connected to the closed frame, but the open frame is larger than the closed frame. Since the Nordskog ref has the frames slidably connected, it is not readily apparent to combine the references to reach the present invention as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
